Value of Work

Based on the uploaded NCERT chapter, pages 183–194

इस अध्याय के सभी मुख्य विषयों, पाठ में दी गई गतिविधियों, Think About It, Let's Explore और अंत के प्रश्नों के उत्तर सरल अंग्रेजी में दिए गए हैं। साथ ही परीक्षा की तैयारी के लिए प्रत्येक विषय से महत्वपूर्ण प्रश्न-उत्तर भी शामिल हैं।

Part 1: Textbook Questions and Answers

A. The Big Questions (Page 183)

Q1. What are the different types of activities that people engage in?

Answer: People engage in two types of activities: economic activities and non-economic activities. Economic activities are done to earn money or receive payment. Non-economic activities are done out of love, care, respect, gratitude, or a desire to help others.

Q2. What is their contribution to our everyday lives?

Answer: Economic activities provide us with goods, services, income, and the things we need. Non-economic activities provide love, care, happiness, social support, and help to others. Both types of activities make our lives better.

B. Let's Explore: Activities in Anu and Kabir's Story (Page 185)

Q. What activities did the people in Anu's and Kabir's story engage in? Mention them in the table.

Character	Activity	Type of activity
Geeta Aunty	Working as an Indian Air Force pilot	Economic
Kabir's grandfather	Teaching Geography to neighbourhood children for free	Non-economic
Kabir's grandfather	Looking after his vegetable garden	Non-economic, as described in the story
Kabir's grandfather	Running errands for the home	Non-economic
Anu's parents	Running a shop selling uniforms and	Economic

	garments	
Anu's mother	Teaching stitching to women voluntarily	Non-economic
Rohan	Working as a software engineer	Economic
Rohan	Teaching computer skills to young adults for free	Non-economic

Note: The classification of an activity depends on its purpose and whether it involves payment. For example, gardening for personal enjoyment is non-economic, while growing vegetables for sale is economic.

C. Let's Explore: Classify the Activities (Page 187)

Q. Classify the activities in the story as economic or non-economic.

Answer:

1. Geeta Aunty working as an Air Force pilot — Economic activity.
2. Kabir's grandfather teaching children for free — Non-economic activity.
3. Kabir's grandfather looking after his garden for personal use — Non-economic activity.
4. Anu's parents running a clothing shop — Economic activity.
5. Anu's mother teaching stitching voluntarily — Non-economic activity.
6. Rohan working in a software company — Economic activity.
7. Rohan teaching computer skills voluntarily on weekends — Non-economic activity.

D. Think About It (Page 187)

Q1. When Kabir's grandfather voluntarily teaches neighbourhood children for free, is it an economic activity or a non-economic activity? How is it different from your teachers teaching you at school?

Answer: Kabir's grandfather's teaching is a non-economic activity because he teaches for free to help children. Schoolteachers generally receive a salary for teaching, so their teaching is an economic activity. Both activities help children learn.

Q2. What are some non-economic activities that are important to you and your family? Why are they valuable?

Answer: Cooking food, caring for family members, helping children with homework, and looking after grandparents are important non-economic activities. They show love and care, strengthen family relationships, and make family members happy.

E. Think About It: Activities on the Way to School (Page 189)

Q. On your way from home to school, can you recall the various economic activities that people are engaged in? In what ways do you think those people are paid?

Answer: I see shopkeepers, farmers, bus drivers, teachers, vegetable sellers, and construction workers engaged in economic activities. They receive money in different ways. Some earn a salary, some receive daily wages, and others earn money by selling goods or providing services.

F. Let's Explore: Activities That Create Monetary Value (Page 191)

Q. Put a tick against the activities or professions that create monetary value. Give examples.

Activity / Profession	Creates monetary value?	Example
1. Baker	Yes	Sells bread and cakes.
2. Tailor	Yes	Stitches clothes for payment.
3. Farmers repairing their tractor	Yes, when done as paid work or for business	Repairs a tractor to continue farming or provides repair services for payment.
4. Doctor	Yes	Treats patients and receives fees or a salary.
5. Parents cooking dinner for their family	No, normally	Cooks food out of love and care.
6. Scientist	Yes, when employed or paid for research	Receives a salary for scientific work.
7. Person taking care of a sick grandparent	No, normally	Cares for the grandparent out of love.
8. Carpenter	Yes	Makes furniture and sells it.
9. Bus driver	Yes	Receives a salary or wages for driving.

Important: The same type of work may be economic or non-economic depending on whether it is done for payment or voluntarily.

G. Think About It: Community Participation (Page 193)

Q1. Many communities in India have similar practices that involve community participation. Can you identify a few from your area?

Answer: People in my area take part in cleaning streets, planting trees, helping poor families, organising community kitchens, and supporting people during festivals or emergencies. These activities bring people together and help the community.

Q2. During festivals, people gather to organise activities, decorate places, and share food. Are these non-economic activities? Why do they still hold value?

Answer: Yes, these are generally non-economic activities when people participate voluntarily without payment. They are valuable because they promote cooperation, friendship, happiness, unity, and a sense of belonging.

Q3. Can you identify community programmes undertaken by your school or locality? What did you observe?

Answer: Our school or locality may organise cleanliness drives, tree plantation programmes, awareness campaigns, and activities to help needy people. I observe that people work together, learn to cooperate, and help make the surroundings cleaner and better.

H. Questions, Activities and Projects (Pages 193–194)

Q1. How are economic activities different from non-economic activities?

Answer: Economic activities are performed to earn money or receive payment. They create monetary value. Non-economic activities are performed without expecting monetary payment, usually out of love, care, respect, gratitude, or a desire to help others.

Examples:

- Economic: A doctor treating patients for a fee.
- Non-economic: A daughter caring for her sick mother without payment.

Q2. What kind of economic activities do people engage in? Illustrate with examples.

Answer: People engage in different economic activities, such as:

1. Production: A farmer grows crops, and a carpenter makes furniture.
2. Trade: A shopkeeper sells clothes or food.
3. Services: A teacher teaches in a school, a doctor treats patients, and a driver transports people.
4. Construction: Workers build roads, houses, and bridges.

People receive salaries, wages, fees, or income from the sale of goods and services.

Q3. There is great value attached to people who are engaged in community service activities. Comment on this statement.

Answer: Community service is very valuable because it helps people without expecting anything in return. It develops kindness, cooperation, and responsibility. Activities such as cleaning public places, planting trees, and serving free food improve society and bring people together.

Q4. What are the various ways in which people are compensated for various economic activities? Give some examples.

Answer: People are compensated for economic activities in different ways:

- Salary: A teacher or office employee receives a regular salary.
- Wages: A construction worker may receive daily wages.
- Fee: A doctor or lawyer may charge a fee for services.
- Profit or business income: A shopkeeper earns money by selling goods.
- Payment in kind: A worker may receive goods instead of money, such as mangoes for part of the payment.

Part 2: Important Questions from Every Topic

Topic 1: Meaning and Types of Activities

Q1. What is an activity?

Answer: An activity is an action or task performed by a person.

Q2. What are the two main types of activities discussed in this chapter?

Answer: The two main types are economic activities and non-economic activities.

Q3. What is an economic activity?

Answer: An economic activity is an activity that involves money or is performed in exchange for money or something of monetary value.

Q4. Give five examples of economic activities.

Answer: Farming for sale, teaching for a salary, selling clothes, treating patients for a fee, and driving a bus for wages.

Q5. What is a non-economic activity?

Answer: A non-economic activity is an activity that does not generate income or wealth and is generally performed out of love, care, respect, or gratitude.

Q6. Give five examples of non-economic activities.

Answer: Cooking for one's family, helping children with homework, caring for grandparents, teaching poor children for free, and helping family members repair their house voluntarily.

Q7. Can the same activity be economic as well as non-economic? Explain.

Answer: Yes. For example, teaching in a school for a salary is an economic activity. Teaching children for free as a voluntary service is a non-economic activity.

Q8. Are non-economic activities useless because they do not earn money?

Answer: No. They provide love, care, happiness, emotional support, and social welfare. They are important even though they do not directly earn money.

Topic 2: Economic Activities in Everyday Life

Q1. What is a market?

Answer: A market is a place where people exchange goods and services. In most markets, goods and services are exchanged for money.

Q2. What is money's worth?

Answer: Money's worth is the monetary value a person places on an object based on the benefit they receive from it.

Q3. What is a fee?

Answer: A fee is a payment made to a person or organisation in exchange for professional advice or services. For example, a fee paid to a doctor.

Q4. What is a salary?

Answer: A salary is a fixed, regular payment generally paid by an employer to an employee, often monthly.

Q5. Why is a pilot's work an economic activity?

Answer: A pilot who receives a salary for performing her duties is engaged in an economic activity.

Q6. Why is running a shop an economic activity?

Answer: Running a shop is an economic activity because the shopkeeper sells goods and earns money.

Q7. Is volunteering an economic activity?

Answer: Volunteering without expecting payment is generally a non-economic activity because the person works to help others rather than to earn money.

Topic 3: Types of Payment for Work

Q1. What is a wage?

Answer: A wage is a payment made by an employer to a worker for work performed during a specific period.

Q2. What is payment in kind?

Answer: Payment in kind is a non-cash payment received for work. For example, a farm labourer may receive some mangoes as part of the payment for working in an orchard.

Q3. How is a salary different from a wage?

Answer: A salary is generally a fixed and regular payment, often monthly. A wage is commonly paid according to the time worked or the amount of work done.

Q4. How is a fee different from a salary?

Answer: A salary is a regular payment made to an employee. A fee is charged for a particular professional service, such as a medical consultation.

Q5. Name four ways in which people may receive payment for economic activities.

Answer: Salary, wages, fees, and payment in kind. Business owners may also earn income or profit from selling goods and services.

Q6. What is the payment received by Sahil in the chapter's story?

Answer: Sahil receives part of his payment in cash and the remaining part in mangoes of equal value. The mangoes are an example of payment in kind.

Topic 4: Value Addition

Q1. What is value addition?

Answer: Value addition is the process of increasing the value of something by changing it into another form or making it more useful.

Q2. Explain value addition with the example of Rajesh, the carpenter.

Answer: Rajesh buys wood for ₹600 and makes a chair. He sells the chair for ₹1,000. The chair has a higher value than the wood because Rajesh uses his skill, time, effort, tools, and other materials to make it.

Q3. How much more is the selling price of the chair than the cost of the wood?

Answer:

Cost of wood = ₹600

Selling price of chair = ₹1,000

Difference = ₹1,000 − ₹600 = ₹400

Q4. Does the ₹400 difference necessarily mean that Rajesh earns ₹400 as profit?

Answer: No. The ₹400 is the difference between the selling price and the cost of the wood alone. Rajesh may also have to pay for tools, other materials, transport, and other expenses. Therefore, the actual profit may be less than ₹400.

Q5. Give three other examples of value addition.

Answer:

1. A baker turns flour into bread.
2. A tailor turns cloth into clothes.
3. A potter turns clay into pots.

Q6. Why is value addition important in economic activities?

Answer: Value addition makes goods more useful or valuable. It helps people earn income and contributes to economic activity.

Topic 5: Importance of Non-Economic Activities

Q1. Why are non-economic activities important?

Answer: They provide love, care, emotional support, satisfaction, and happiness. They improve personal well-being and the quality of life.

Q2. What is seva?

Answer: Seva means selfless service. It is helping others without expecting anything in return.

Q3. Where can we see examples of seva?

Answer: We can see seva in temples, gurudwaras, mosques, churches, community kitchens, and voluntary service programmes.

Q4. What is a langar?

Answer: A langar is a community kitchen, especially associated with gurudwaras, where food is served free to visitors.

Q5. How does serving free food help society?

Answer: It helps people meet their basic needs, encourages equality and sharing, and develops kindness and a sense of community.

Q6. Why is caring for an elderly family member valuable?

Answer: It shows love, respect, and responsibility. It also gives the elderly person emotional support and comfort.

Q7. How do non-economic activities improve our quality of life?

Answer: They strengthen relationships, create happiness, build trust, and make families and communities more supportive.

Topic 6: Community Participation

Q1. What is community participation?

Answer: Community participation means people working together to improve their neighbourhood or society.

Q2. What is the Swachh Bharat Abhiyan?

Answer: Swachh Bharat Abhiyan is an initiative that encourages citizens to keep their homes, neighbourhoods, streets, parks, and other public places clean.

Q3. How does community participation help keep our surroundings clean?

Answer: When people work together to clean streets, roads, parks, and public places, the whole community becomes cleaner and healthier.

Q4. What is Van Mahotsav?

Answer: Van Mahotsav is a tree-plantation and awareness initiative that promotes the importance of trees and the conservation of forests.

Q5. How does Van Mahotsav benefit society?

Answer: It encourages people to plant trees, protect forests, and understand the importance of the environment.

Q6. Give four examples of community participation.

Answer:

1. Cleaning public places.
2. Planting trees.
3. Organising community kitchens.
4. Helping people during emergencies.

Q7. Why should people participate in community service?

Answer: Community service improves society, develops cooperation, helps people in need, and creates a sense of responsibility.

Q8. Are all community activities non-economic?

Answer: No. Voluntary community service is generally non-economic, but people employed and paid to provide community services are engaged in economic activities.

Part 3: Important Definitions

Term	Simple meaning
Economic activity	Work that involves money or monetary value.
Non-economic activity	Work generally done out of love, care, respect, or gratitude, without payment.
Market	A place where goods and services are exchanged.
Money's worth	The monetary value of an object or benefit.
Fee	Payment for a professional service.
Salary	A regular payment made to an employee.
Wage	Payment made to a worker for work performed.
Payment in kind	Payment made in goods or services instead of money.
Value addition	Increasing the value of something by transforming it or making it more useful.
Seva	Selfless service to others.
Community participation	People working together for the benefit of society.
Swachh Bharat Abhiyan	An initiative to promote cleanliness.
Van Mahotsav	An initiative promoting tree planting and forest conservation.

Part 4: Multiple-Choice Questions (MCQs)

Practice Quiz

0/15 answered

1. Which of the following is an economic activity?

A. Helping a friend for free
B. Teaching in a school for a salary
C. Caring for a grandparent
D. Cooking for one's family

2. Which activity is generally non-economic?

A. Selling vegetables
B. Working as a doctor for a fee
C. Teaching children voluntarily for free
D. Driving a bus for wages

3. What is a fee?

A. A type of tree
B. Payment for a professional service
C. A free gift
D. A market

4. What is a salary?

A. A regular payment to an employee
B. A payment only in goods
C. A free service
D. A type of market

5. What is payment in kind?

A. Payment in cash only
B. Payment through goods instead of money
C. A monthly salary only
D. A donation

6. What is value addition?

A. Reducing the usefulness of goods
B. Increasing value by transforming something
C. Giving everything away for free
D. Avoiding work

7. Rajesh buys wood for ₹600 and sells a chair for ₹1,000. What is the difference?

A. ₹200
B. ₹300
C. ₹400
D. ₹600

8. What does seva mean?

A. Selfless service
B. A salary
C. A business
D. A market

9. Which initiative promotes cleanliness?

A. Van Mahotsav
B. Swachh Bharat Abhiyan
C. A salary scheme
D. Payment in kind

10. What does Van Mahotsav promote?

A. Selling furniture
B. Tree planting and forest conservation
C. Building shops
D. Charging fees

11. Which is an example of community participation?

A. Cleaning a public park together
B. Working alone for personal profit
C. Buying a school bag
D. Receiving a salary

12. Which of these is a non-economic activity?

A. A tailor stitching clothes for payment
B. A doctor treating patients for a fee
C. A child helping a grandparent out of love
D. A shopkeeper selling goods

13. Who adds value to wood by making a chair?

A. A carpenter
B. A passenger
C. A visitor
D. A customer who does nothing

14. What is a market?

A. Only a place for free service
B. A place for exchanging goods and services
C. A place where nobody works
D. A type of salary

15. Why are non-economic activities valuable?

A. They always earn money
B. They support well-being and relationships
C. They replace all paid work
D. They have no social value
Check Answers

Part 5: True or False

Try these statements and check your understanding.

No.	Statement	Answer
1	Economic activities involve money or monetary value.	True
2	All non-economic activities are useless.	False
3	A teacher working for a salary performs an economic activity.	True
4	Teaching children voluntarily for free is generally a non-economic activity.	True
5	A salary is generally a regular payment to an employee.	True
6	Payment in kind is always made in cash.	False
7	A carpenter can add value to wood by making furniture.	True
8	Seva means selfless service.	True
9	Swachh Bharat Abhiyan promotes cleanliness.	True
10	Van Mahotsav promotes tree planting and forest conservation.	True
11	Only paid work can benefit society.	False
12	Community participation encourages cooperation.	True
13	A fee is a payment for a professional service.	True
14	The difference between a product's selling price and its raw material cost is always the final profit.	False
15	Non-economic activities can improve our quality of life.	True

Part 6: Short Revision Notes

- There are two main types of activities: economic and non-economic.
- Economic activities involve money or monetary value.

- Non-economic activities are generally done out of love, care, respect, gratitude, or a desire to help others.
- People may receive a salary, wages, a fee, business income, or payment in kind.
- Value addition increases the value or usefulness of a product.
- Seva means selfless service.
- Swachh Bharat Abhiyan promotes cleanliness.
- Van Mahotsav promotes tree planting and forest conservation.
- Community participation develops cooperation and improves society.
- Both economic and non-economic activities are important for a good quality of life.

Important exam questions to practise

1. Explain the difference between economic and non-economic activities with examples.
2. Explain the different ways in which people are paid for their work.
3. What is value addition? Explain it with Rajesh's example.
4. Why are non-economic activities important in our lives?
5. What is seva? Give two examples.
6. Explain the importance of community participation.
7. How do Swachh Bharat Abhiyan and Van Mahotsav benefit society?
8. Explain why paid work and voluntary service can both contribute to society.

These questions and answers cover the chapter's main explanations, story-based activities, reflection questions, end-of-chapter questions, and additional exam practice in simple English.
